**Science & Tech Day
at the State Capitol**

Date: March 29, 2006

Time: 10:00am-2:00pm

Place: State Capitol- 4th Floor

Growing Hawaii 's science & tech industry is fundamentally about creating high-quality, high-paying JOBS. It's about investing in our future and diversifying our economy. It's about creating great companies and providing valuable jobs for our kids and for those who have left our islands and want to come back home. The strength of our current economy offers a tremendous opportunity to truly accelerate the momentum and create a strong tech industry in Hawaii.

Science & Tech Day at the State Capitol 2006 presents an exciting opportunity for Hawaii 's technology industry to connect with lawmakers. Showcasing over 100 of Hawaii's science & tech companies, it gives lawmakers a chance to see and understand the diversity and growth of our local science & tech industry. By bringing industry to the Capitol - lawmakers, their staff, and the public have a hands-on opportunity to talk directly with tech companies, learn about their products and services, and realize the increasing importance and potential of our industry.

For Hawaii's growing science & tech industry, it's a great way to increase visibility for their companies and collectively, to enhance awareness of the depth and breadth of our industry. It is our opportunity to thank our lawmakers for their past support, demonstrate the positive impact of previous legislation, and work together to ensure the continued growth of this vital industry.

We hope you will participate and together - we can make a difference.
